

ANDRÉ L'ESPÉRANCE, FCIA(1985), FCAS(1998), FSA(1985), MAAA(1996)

In the last 30 years, I contributed to and witnessed the growth of our actuarial profession, especially its increased involvement in the demographic, economic, social, and financial spheres in order to constantly optimize its presence and assistance to the Canadian public and society. The annual call for duty reminder that I received from a number of my colleagues spurred me this year to seriously think about adding further to my modest past contribution to the actuarial profession.

I had the opportunity to serve on both the former Life and Property and Casualty (P&C) Insurance Financial Reporting Committees (contributing actively to the implementation of the new insurance act, the current valuation methods for life, health and P&C insurance, and enhanced financial reporting requirements) as well as on a number of task forces and groups including the committee at the early stages of the Practice Education Course.

In addition to new emerging challenges and issues, the need for a continued effort to work with all people with different knowledge, skills, background, and beliefs to make them fully understand how we, as actuaries, can assist them remains a constant.

Should I be elected, I will commit my best efforts to provide an efficient contribution to the growth and well-being of our actuarial profession and Institute. As a firm believer in teamwork, I will plan to make myself available to assist in the completion of tasks and timely solving of unexpected issues.

Should you decide to support my candidacy, it will be an honour to serve as one of the directors of our Institute. I want to sincerely thank you for showing your devotion to the actuarial profession in Canada by committing to vote at the upcoming elections.
